

Ideation Phase

Brainstorm & Idea Prioritization Template

Date: 22 June 2026

Project Name: Metro Ticket Generating System in ServiceNow

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Selected Problem Statement

Metro passengers often face long queues at ticket counters, manual ticketing delays, and inconvenience in purchasing tickets during peak hours. Traditional paper-based ticketing also increases operational costs and paper consumption.

To address these challenges, a digital Metro Ticket Generating System will be developed using ServiceNow that enables passengers to book tickets online, calculate fares automatically, generate QR-code-based digital tickets, and support cashless payments.

Business Objectives

- Enhance commuter convenience through digital ticket booking.
- Increase operational efficiency using automated fare calculation.
- Promote digital payment adoption.
- Facilitate data-driven decision making through passenger analytics.
- Support environmental sustainability by reducing paper ticket usage.

Stakeholders

- Passengers (End Users)
- Station Managers
- Metro Operations Team
- IT Administrators

Step-2: Brainstorm, Idea Listing and Grouping

Brainstormed Ideas

S.No	Ideas
1	Online Metro Ticket Booking

2	Service Catalog-based Request Form
3	Source and Destination Selection
4	Passenger Type Selection
5	Automated Fare Calculation
6	QR Code Generation
7	Digital Ticket Delivery
8	UPI/Card Payment Integration
9	Email Notification
10	Metro Station Mapping
11	Ticket History Tracking
12	Passenger Analytics Dashboard

Grouping of Ideas

Ticket Booking Features

- Online Ticket Booking
- Source/Destination Selection
- Passenger Type Selection

Automation Features

- Fare Calculation
- QR Code Generation
- Digital Ticket Generation

User Convenience Features

- Payment Integration
- Email Notification
- Ticket History

Management Features

- Station Mapping
- Analytics Dashboard
- Reporting

Step-3: Idea Prioritization

Idea	Priority
Online Ticket Booking	High
Automated Fare Calculation	High

QR Code Generation	High
Station Mapping	High
Payment Integration	Medium
Email Notification	Medium
Ticket History	Medium
Analytics Dashboard	Medium

Final Prioritized Solution

Metro Ticket Generating System in ServiceNow

Functional Scope

- Service Catalog item for ticket booking.
- Variables: Source, Destination, Passenger Type, Number of Tickets.
- Automated fare calculation.
- QR code generation for digital tickets.
- Station details mapping.
- Email confirmation to passengers.
- Ticket history management.
- Reporting and analytics dashboard.

Execution Roadmap

1. Catalog Form Setup
2. Fare Logic Development
3. QR Code Integration
4. Station Details Mapping
5. UI Development
6. User Acceptance Testing
7. Deployment

Expected Outcome

The system will provide a fast, secure, and paperless metro ticketing experience while improving operational efficiency and passenger satisfaction.
