

Ideation Phase

Define the Problem Statements

Date: 22 June 2026

Project Name: Metro Ticket Generating System in ServiceNow

Customer Problem Statement Template

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A metro passenger	Book a metro ticket quickly before my journey	I have to wait in long queues at ticket counters	The ticketing process is mostly manual and time-consuming during peak hours	Frustrated and delayed
PS-2	A metro passenger	Purchase tickets using my mobile device	There is no simple digital ticketing solution available	Traditional ticketing systems depend heavily on physical counters and paper tickets	Inconvenienced and dissatisfied
PS-3	A metro operations manager	Manage ticket sales efficiently	Ticket generation and fare collection require significant manual effort	Existing processes are not fully automated	Inefficient and overloaded
PS-4	A metro passenger	Use a cashless payment method for ticket booking	Multiple payment options are not always available	Digital payment integration is limited	Restricted and inconvenienced
PS-5	A metro administrator	Analyze passenger travel patterns and ticket sales	Passenger data is difficult to collect and monitor	Ticketing records are not centralized in a digital platform	Unable to make informed decisions
PS-6	A metro organization	Reduce paper ticket usage and operational costs	Large numbers of paper tickets are issued daily	Traditional ticketing methods rely on printed tickets	Concerned about costs and environmental impact

Selected Problem Statement

PS-1: A metro passenger is trying to book a metro ticket quickly before a journey, but has to wait in long queues at ticket counters because the ticketing process is mostly manual and time-consuming during peak hours, which makes the passenger feel frustrated and delayed.

Proposed Solution

Develop a **Metro Ticket Generating System in ServiceNow** that provides:

- Online ticket booking through Service Catalog.
- Automated fare calculation.
- QR-code-based digital ticket generation.
- Cashless payment support.
- Station details mapping.
- Ticket history tracking.
- Reporting and analytics dashboard.

This solution will improve commuter convenience, increase operational efficiency, promote digital payments, and support sustainable paperless ticketing.
